

Now you have a *choice!*

When your **image** matters™

Finally, a complete line of OEM compatible, cost-effective ID card ribbons are available to help you increase your supply sales and profits.

UCA **Proven performance.** With more than 15 years as an industry leader in the development and manufacturing of thermal imaging products, UCA understands the critical match between the ribbon, media, and printer necessary to maximize the performance of the printing system and ensure trouble-free operation.

UCA **"Vivid Colors and Real Black".**

- ▶ Our vivid, lifelike color dyes produce the industry's most photorealistic 24 bit color and grayscale images. By using 16.7 million colors, exact photo reproduction and Pantone Ink matching can be achieved.
- ▶ Industry-leading Overlay technology provides superior card image durability and is effective in significantly reducing dye migration.
- ▶ Proprietary back coating system is designed to reduce static and printhead wear due to abrasion, resulting in lower operating costs for the user.
- ▶ Black Resin formula offers the highest optical density available, while providing outstanding edge definition and crisp resolution for the printing of bar codes. In addition, our high sensitivity formulation allows users to reduce printhead energy, thus extending the life of the printhead and reducing their printing costs.
- ▶ Our ID card ribbons are manufactured to meet or exceed the OEM specifications and come with the industry's strongest "Satisfaction Guarantee"
